

**Subject: «Reopening of the Corinth Canal»**

Dear Mr. Vallis,

The Corinth Canal, a landmark of international significance and an important national infrastructure, is methodically and systematically entering a new era, modernizing its operational model with a steadfast commitment to safety, reliability, operational continuity, customer service, and continuous development.

The recent technical interventions currently underway form part of a comprehensive strategy aimed at long-term resilience and institutional consistency and continuity. The Canal, aligned with international operating standards, is continuously upgrading its safety standards in order to meet the ever-increasing demands of shipping and tourism, while simultaneously marking the operational transition to a model of continuous operation 24 hours a day, 7 days a week, 365 days a year, thus completing a complex and multi-year project.

In accordance with the relevant Ministerial Decision, we inform you that the reopening of the Canal is scheduled for the week commencing Monday, 29 June 2026. You will be systematically and promptly informed of any further developments.

Operational continuity, predictability, reliability, and customer service constitute a central pillar of our corporate operation. Our team, deeply valuing the longstanding cooperation and trust you have demonstrated, remains at your disposal for any further coordination or clarification.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Georgios Zougliis'.

Georgios Zougliis,

General Manager
